“TeacherEase is a great web-based program that allows teachers to follow our curriculum, share lesson plans, and cover the standards.”

– L.B., Curriculum Director

COMMON GOAL
SYSTEMS INC

Are you struggling to understand and improve your curriculum?
 Is your curriculum being used in the classroom?
 Are you re-teaching some topics and missing others?
 Is your curriculum adequately preparing your students for state assessments?
 Need help with these answers? Let us help with TeacherEase.

INTEGRATED LESSON PLANNING AND CURRICULUM MAPPING

Design standards-based curriculum. Get organized. Define an “official” curriculum map for each course. Specify the units/topics to be taught and the timeline to deliver these lessons. Make sure the curriculum covers standards. Identify gaps and overlaps to streamline curriculum.

Distribute curriculum. Make it easy for teachers to follow the curriculum. View curriculum online. Teachers may view all grade level curriculum to understand the overall impact on the students’ total educational experience.

Use curriculum in lesson planning. Teachers build lessons that follow the curriculum, and know which standards are covered. Speed lesson plan development and save teachers’ time.

Share lesson plans. Teachers learn from each other. Reuse and update lesson plans. Great resource for new teachers and reference for experienced teachers.

Easily find standards. Teachers search and view standards at all grade levels and subject areas. Standards are pre-loaded for all 50 states. Districts can create their own standards, too.

Administrators view lesson plans. Easily monitor the progress of curriculum in every classroom, in real time. No paper to print or collect.

Access online. Completely web-based service. Accessible anywhere via the Internet. No software installation or hardware purchase required. Reliable, secure, and always available.
